

**Supplies List**  
**Advanced Placement Chemistry**  
**Mrs. Testen**

**Contact Information: [mtesten@learningcommunity202.org](mailto:mtesten@learningcommunity202.org)**

**Supplies:**

Writing implements, erasers, ruler  
Paper for keeping notes and doing homework  
    Do not hand in homework on pages torn out of a notebook!  
3-ring binder  
Scientific calculator (not necessarily graphing- TI 30 is fine)  
bound lab notebook  
a whiteboard marker (optional)

**We will be using Word, Excel and Graphical Analysis programs**

**I will send information to you over the internet, so I will need an address for you.**

**Absences:**

This is an advanced class. If you are absent, you are responsible for getting the notes from another member of your class. You will be responsible for assigned homework. Any handouts will be in the maroon milk crate at the side of the room. Any handouts will be arranged by chapter/topic and have the day they were planned for on them.

**Laboratory Notebooks:**

Each of you will record your laboratory data in your laboratory notebook. This is a bound (stitched) notebook, usually called a "composition book." It may be lined but the type with graph paper pages is better. Colleges may want to see your graded book.

All data is written in permanent ink, preferably black. Errors are never erased, whited out, or otherwise made unreadable. If you make an error, or change your mind about a conclusion, draw one line through what you are correcting. The original must still be legible. Make corrections this way on lab data and exams.

Finally, if you did not get the review packet, contact me at [mtesten@learningcommunity202.org](mailto:mtesten@learningcommunity202.org)  
I will get something to you.

See you in August!
